## Proposition of requirements for Minimum Information About a Plant Phenotypic Experiment (MIAPPE)

The list below should be consulted by people recording and depositing the data. It covers most aspects of plant phenotyping experiment. Attributes in yellow are included in the default version of MIAPPE-compliant ISA-TAB configuration prepared by transPLANT.

### Proposed structure of MIAPPE

Checklist part	Proposition
Study	Accept existing list(s)
Environment	Accept existing list(s)
Biosource	Accept existing list(s)
Treatments	Accept existing list(s)
Experimental design	New list (gap)
Sample: collection, processing, management,	Accept existing list(s) + additional attributes (gap)
Phenotypic traits: values, type, measurement protocol, processing protocol, scale, units	New list (gap)

## Proposed checklists for MIAPPE elements

Checklist section	Attributes (number of: 1 or multiple)	Source list / Biosharing ID / Reference	Alternative checklist / Biosharing ID / Reference
Study	Identifier 1 Title 1 Description 1 Submission date 1 Public release date 1 Publications m	<b>Default ISA-TAB tools configuration</b> <a href="http://www.biosharing.org/bsg-000078">http://www.biosharing.org/bsg-000078</a>	
Environment	Description of any field environment: Geographic location m Altitude or depth m Habitat m Meteorological conditions m Lunar or solar phase m All other measured parameters m  Description of any laboratory environment: Laboratory address and contact details m  Description of terrestrial environment: Inclination and aspect m Substrate type m Substrate temperature m All other measured parameters m  Description of aquatic environment: Sample was submerged and emerged (how deep, how long) m Water temperature m Tidal phase m All other measured parameters m  Description of atmospheric environment:	<b>CIMR: Environmental Analysis Context</b> <a href="http://www.biosharing.org/bsg-000175">http://www.biosharing.org/bsg-000175</a>  Morrison et al. (2007) <a href="http://msi-workgroups.sourceforge.net/bio-metadata/reporting/env/reporting-requirements/ECWSG_reporting_requirements_v1.rtf">http://msi-workgroups.sourceforge.net/bio-metadata/reporting/env/reporting-requirements/ECWSG_reporting_requirements_v1.rtf</a>	<b>MIxS environment</b> <a href="http://www.biosharing.org/bsg-000518">http://www.biosharing.org/bsg-000518</a>

	Atmospheric temperature All other measured parameters	m m		
	Description of biotic environment: Description of host organism Relationship of organism(s) to host All other measured parameters	m m m		
Biosource	Organism (host taxid) Infra_specific_name Infra_specific_rank Host common name Genotype	1 1 1 1 m	<b>MIxS Plant-associated environmental package</b> <a href="http://www.biosharing.org/bsg-000518">http://www.biosharing.org/bsg-000518</a>  Yilmaz et al.
